environment.**

**Workplaces are important for
health promotion with a
comprehensive individual and
collective vision that has a
biological, social, and
psychological scope.**

Background

A safe and healthy workplace approach continues to change hand in hand with the organizational company tendencies, and their most important asset, "the employee", where employees health impact in countries economy is comprised.

Workplaces are important for health promotion with a comprehensive individual and collective vision that has a biological, social, and psychological scope. This is translated into occupational health, which focuses on the promotion of OSH prevention that go beyond the OSH factors encountered in the workplace, which impacts, even, those no work-related activities. Nowadays there is a growth in

programmes on healthy lifestyles, as well as in those that tend to identify the damage derived from safety and hygiene, ergonomic and psychosocial risk factors through the legal approach on safety and health at work.

In the context of advances in Occupational Safety & Health (OSH), there are trends towards the development and updating of policies on the matter within the framework of worker's rights, gender perspective, disability, and age. Similarly, in the quality of preventive actions, an occupational risk management model is required that strengthens Inspection and guarantees of social protection when prevention has failed. An Occupational Safety & Health

Good management practices for a safe & healthy work environment.

World Day for Safety and Health at Work April 28th.

management system is increasingly demanding, its compliance result in a challenge for countries that are developing a preventive culture to transfer knowledge to micro and small businesses.

This webinar is dedicated to the World Day for Safety and Health at Work – April 28th. Its objective is to disseminate good

practices and trends in the field of OSH, considering gender awareness, age, and disability to guarantee adequate preventive management for safe & healthy work environments.
